To inform selective principals of the Alternative to Outdoor Suspension (AOS) Program.

Under the direction of the Office of School Operations, the Miami-Dade County Public School System has created three Alternative to Outdoor Suspension (AOS) sites across the District. The purpose of this program is twofold: to provide a safe haven to students (grades 6-12) that have been placed on an approved school site outdoor suspension, as well as reduce the outdoor suspension rates district wide.

Attached are the following:

- An overview of the school assignments by site location for schools that qualify for this program.
- Folders that contain articulation documents for two of the AOS sites that are currently available as of August 25, 2014.

Once site #3 (TBA) is open, School Operations will provide information to those schools who qualify. We are hopeful that selected schools will take advantage of this opportunity.
